

CITY OF PARK RIDGE PUBLIC RIGHT-OF-WAY ADA POLICY AND TRANSITION PLAN

Created January 2022

Revised November 2023

This document evaluates the City's current compliance level with the infrastructure requirements of the Americans with Disabilities Act (ADA) and establishes a plan for making progress going forward. This transition plan will guide the City in establishing, maintaining and administering mobility and accessibility in City-owned parking lots and other parking facilities, right-of-way and intersections.

BACKGROUND

The American with Disabilities Act (ADA) of 1990 is a Federal Civil Rights Legislation which mandates non-discrimination to persons with disabilities. The ADA, Title II prohibits discrimination by public entities on the basis of disability. Therefore, it is important that the City of Park Ridge, as a recipient of federal funding, complies with all applicable federal and state laws, including those protecting persons with disabilities.

In order to accomplish this, the City of Park Ridge is developing a Transition Plan by conducting a self-evaluation of:

- Its public right-of-way to ensure accessibility by persons with disabilities;
- Identifying issues of accessibility that need to be addressed;
- Developing a schedule for the improvement of those facilities; and
- Complying with ADA mandated standards for all new construction projects.

The City of Park Ridge will progressively remove physical barriers to accessibility when facilities adjacent to its roadways cannot ensure access to persons with special needs. Realizing that infrastructure and structural changes will take time and money to upgrade existing facilities, the City of Park Ridge's Transition Plan includes provisions to include specifications on upcoming design projects, to comply with ADA requirements.

The ADA regulations further require the Transition Plan to contain the following elements:

- The name of the official responsible for the plan's implementation;
- A list of physical barriers in the public entity's facilities that limit accessibility of its programs, services, or activities to individuals with disabilities (the Self-Evaluation);
- A detail description of the methods to be utilized to remove these barriers and make the facilities accessible;
- A Schedule for taking the necessary steps to achieve compliance with Title II;
- A schedule for providing Curb Ramps or other Sloped Areas where pedestrian walkways cross the curb and gutter.

ADA POLICY

ADA Policy Statement

The City of Park Ridge is committed to full compliance with Title II of the Americans with Disabilities Act of 1990 as amended (ADA), Section 504 of the Rehabilitation Act of 1973 as amended (Section 504), 2010 ADA Standards for Accessible Design and all related regulations, laws, executive orders, and directives.

The purpose of the City of Park Ridge's ADA Policy is to provide guidance for requesting modifications to ensure safe access to the City's programs, services, and activities; and submitting a grievance when the possibility of discrimination may have occurred due to a disability.

Responsible Official

The City of Park Ridge has designated an ADA Coordinator as the person responsible for the development and implementation of the ADA Policy and the ADA Transition Plan. The City's City Engineer is appointed as the ADA Coordinator for all Public Right-of-Way (streets, sidewalks, intersections).

Grievance Procedure

This grievance procedure is established to meet the requirements of the Americans with Disabilities Act of 1990 ("ADA"). It may be used by anyone wishing to file a complaint alleging discrimination on the basis of disability in the provision of services, activities, programs or benefits by the City of Park Ridge.

The City of Park Ridge's Municipal Code **Article 2 - Chapter 25**, *Americans with Disabilities Act Complaint Procedure*, identifies the procedure to lodge a complaint where ADA accessibility is involved.

The complaint should be in writing and should be sent to:

City of Park Ridge
City Engineer
505 Butler Place
Park Ridge, IL 60068

The complaint should contain information about the alleged discrimination (such as name, address, telephone number of complainant, and location, date, and description of the problem). Alternative means of filing complaints (such as through personal interviews or tape recording of the complaint) will be made available for persons with disabilities upon request.

The complaint should be made as soon as possible but not later than 60 calendar days after the alleged violation. This procedure shall not affect, nor be affected by, other remedies such person may have under the law.

The ADA Coordinator will meet with the complainant within 15 calendar days after receipt of the complaint to discuss the complaint and possible resolutions. Within 15 calendar days after that meeting, the ADA Coordinator will respond to the complaint in writing and, where appropriate, in a format accessible to the complainant, such as large print or audiotape. The response will explain the City's position and offer options for substantive resolution of the complaint.

If the ADA Coordinator's response does not satisfactorily resolve the issue, the complainant may appeal the decision, within 15 calendar days after receipt of the response, to the City Manager of his/her designee.

Within 15 calendar days after receipt of the appeal, the City Manager will meet with the complainant to discuss the complaint and possible resolutions. Within 15 calendar days after that meeting, the City Manager will respond to the complaint in writing and, where appropriate, in a format accessible to the complainant. The response will explain the City's position and offer options for substantive resolution of the complaint.

All written complaints received by the ADA Coordinator, appeals to the City Manager, and responses from these two offices will be retained by the City for at least three years.

Time requirements may be extended upon mutual agreement of the City and individual issuing the complaint.

TRANSITION PLAN

Physical Barriers Assessment

The City of Park Ridge has completed a Self-Evaluation to assess their road and sidewalk inventory for compliance to ADA standards. The City is committed to upgrading and implementing ADA regulations and has done so on every road project since enacted by federal regulations. All road improvement projects overseen by IDOT within the City have implemented and been in compliance with ADA standards at the time of construction or improvement.

The City of Park Ridge, as part of its GIS system, has created a collector application to aid in conducting field investigations and is using this app to continually update its inventory of public right-of-way. This information will be used to update this ADA Transition Plan annually.

Identification of Physical Barriers

Access to and utilization of the City of Park Ridge facilities by individuals with disabilities can be compromised by barriers described below. The barrier descriptions are not necessarily exhaustive, but they represent the types of issues identified by the City of Park Ridge during the Self-Evaluation.

In general, the City of Park Ridge street system provides traveling routes in which local and the traveling public visit public buildings and other services. Sidewalk that is non-compliant can provide obstacles to accessibility for pedestrians. The following are issues noted along pedestrian ways:

1. Curb ramps may have incorrect slopes, lack detectable warning tiles, or lack flush curb transitions
2. Sidewalks have incorrect slopes or surface defects
3. The presence of fire hydrants, utility poles, and mailboxes can cause obstructions along pedestrian ways

The following strategy will be incorporated within the city's maintenance plan for public right-of-way and facilities:

1. ADA Ramps. The City of Park Ridge contracts for upgrading of existing ramps on an annual basis, via its Streets Maintenance Program, Sidewalk Replacement program, and Alley Repair Program. These will include ramps at intersections and alleys on streets that are contracted to be improved in that calendar year.
2. Utilities. Whenever a utility relocation, construction or alteration occurs within the public right-of-way, the City of Park Ridge will ensure that ADA requirements are implemented.
3. Transit. Transit stops are limited within the City of Park Ridge. The city will access those public stops that are located on City right-of-way and develop a plan to correct if such stops are determined out of compliance with ADA standards.

4. Right-of-way Projects. All right-of-way projects involving street and pedestrian ways will be evaluated and designed accordingly with the 2010 ADA standards. All new construction and improvements to existing facilities will adhere to these standards.

Self-Evaluation

The City has performed a Self-Evaluation of the entire pedestrian network within City Right-of-Way. The evaluation was done in two phases: curb ramps and sidewalks. “Curb ramps” refer to pedestrian crossing ramps at street intersections and include the ramp, landing pad, and curb transition. “Sidewalks” refer to entire lengths of sidewalk from street to street, omitting curb ramps and landings.

The surveys were performed by a combination of City staff and contracted staff from Baxter & Woodman Inc. The surveys were performed using GIS applications to collect data in the field. Planimetric (LiDAR) data was used to generate sidewalk lines on to which inspection data was collected. Inspection tools included: smart level, measuring tape, measuring wheel, and tablet for data collection.

Curb Ramp Inventory

In the spring of 2022, the City began an evaluation of all curb ramps within the City Right-of-Way. The survey was completed in October 2022. The City has created a working inventory that can be updated as curb ramps are improved annually. The results of the 2022 survey are summarized below. The full inventory can be found in Appendix A.

Summary: The City of Park Ridge has 3,222 curb ramps. At the time of the survey’s completion, the City's evaluation found that 48% of curbs ramps meet all ADA standards. Approximately 44% of curb ramp lack detectable warning tiles but are otherwise accessible. Approximately 8% of curb ramps have some physical barrier impeding accessibility, such as the slope, landing, or flush curb transition.

Total Curb Ramps	3222	
ADA compliant	1558	48%
Missing detectable warning tile	1405	44%
Physical barrier	259	8%

Sidewalk Inventory

In December of 2022, the City began an evaluation of all sidewalks within the City Right-of-Way. The survey was completed in May of 2023. The results of the survey are summarized below. The full inventory can be found in Appendix B.

Summary: The City of Park Ridge has approximately 839,015 linear feet of sidewalk within the City Right-of-Way. At the time of the survey’s completion, the City’s evaluation found that 76% of the sidewalk network met ADA standards. Approximately 24% of sidewalk was found to be non-compliant. The most common issues found were cross-slope and surface defects.

The City’s sidewalk network is built well for accessibility – with almost all sidewalks meeting a standard width of 5 feet. The defects that were most commonly found can be attributed to typical maintenance issues such as sidewalks that have shifted, settled, heaved, cracked, or are being lifted by tree roots. The City’s evaluation did not find any significant patterns or areas with concentrated issues at the neighborhood level.

Total Length of Sidewalk	839,015 LF	
Length of ADA Compliant Sidewalk	634,690 LF	76%
Length of Non-Compliant Sidewalk	204,325 LF	24%

Breakdown by Issue Type

Cross-Slope Issue	136,920 LF
Surface Defect*	61,895 LF
Non-Compliant Width	4,940 LF
Running Slope Issue	570 LF

**Surface Defect category includes vertical separation, cracks, broken or missing pieces, excessive scaling or pitting, and any other miscellaneous obstructions*

Targeted Barrier Removal Projects

Upon funding availability, the City of Park Ridge will implement a barrier removal program within the right-of-way facilities. The program is based on the inventory conducted by the City of Park Ridge and it constitutes the Transition Plan of accessibility and upgrades.

The top priority of the City of Park Ridge's Transition Plan is to make the City of Park Ridge's existing facilities accessible first. The City of Park Ridge facilities are those which serve pedestrians within the public right-of-way.

When appropriate, the City of Park Ridge will replace existing facilities by reconstructing new ones, thereby bringing them into compliance. Applicable new ADA facilities and respective upgrades will be included in the projects.

The City of Park Ridge through its Public Works Department is responsible for the City of Park Ridge's Transition Plan within the public right-of-way. Most of the problems within the right-of-ways concern physical barriers that cannot be addressed through other options such as Policy Changes or alternative methods. Therefore, the public right-of-way can only be made accessible through a realistic and fundable strategy for curb and gutter modifications, wheelchair ramp construction and some sidewalk modifications.

Methods used for Improvements

Standards currently implemented by the City of Park Ridge, when undergoing new or improvement road projects, adhere to those ADA laws and published under the Illinois Department of Transportation (IDOT) Standard Drawings for Pedestrian Access Details for Curb Ramps, Median Curb Details, Pedestrian Islands, Driveways and Driveway Aprons, Stairway and Handrail requirements, Accessible Parking, all aided by a Detectable Warning Surface where applicable.

Schedule for Improvements

The City of Park Ridge has the responsibility of identifying barriers and implementing a corrective program. As funding to overcome the deficiencies is limited, the City of Park Ridge has prioritized upgrading of those existing pedestrian facilities as part of the City's annual Streets Improvement Plan, as well as annual Sidewalk and Alley Repair Programs.

The Streets Improvement Plan identifies roadways in greatest need of repair and improvements through a yearly evaluation process. Improvements are made to both vehicular and pedestrian facilities on chosen streets. The Sidewalk Replacement Program addresses trip hazards and accessibility issues through an annual survey and repairs. The City's Alley Repair Program includes improvements to pedestrian crossings at alley aprons.

The City will annually review the City fiscal allocation for ADA improvements to improve facilities that present physical barriers or to implement ADA regulations in new projects. The City of Park Ridge will strategically commit, upon fund availability, funding for City of Park Ridge maintenance projects of its annual allocation, towards ADA compliance projects. In addition, developer impacts on the public's right-of-way can be required to further enhance pedestrian facilities. To date, it is unknown the amount of money that the City of Park Ridge has invested into ADA Compliance

Public Input

The City placed copies of the ADA Policy and the ADA Transition Plan at City Hall and on the City website at www.parkridge.us to be reviewed and receive comments from the public.

The public may provide input in writing to the City of Park Ridge Public Works Department.

APPENDIX C

Explanation of Survey Methods

Curb Ramp Inventory

Curb ramps are identified by cross street names when applicable or in some instances by closest address. Ramp Number is assigned based on a naming convention which assigns the northwest-most ramp a number "1" and then moves in a clock-wise direction. A typical 4-way intersection will have ramp numbers 1-8, while a 3-way intersection will have ramp numbers 1-6.

Data was collected using an iPad and ESRI's "Field Maps" application. Collection points were pre-generated for each curb ramp using aerial imagery.

The survey includes four inspection categories: detectable warning, slope, landing, and flush curb transition. A "Yes/No" system was used for data collection. An entry of "Yes" indicates the category is compliant, while "No" indicates it is not compliant. A "comments" field was included in the survey to note miscellaneous issues not contained within the four inspection categories.

Sidewalk Inventory

Sidewalks are identified by street names and block numbers. Sidewalk lengths are categorized at the block level and contain survey results for both sides of the street. For example, data for the 500 block of south Prospect includes sidewalk on both the east and west side of the street.

Data was collected using an iPad and ESRI's "Field Maps" application. Collection lines were pre-generated using LiDAR/planometric imagery of sidewalks.

The survey includes four inspection categories: cross slope, running slope, surface defects, and width. Data collection is based on length of defective sidewalk for each category. For surface defect issues such as cracks or vertical separation, the entire square (typically 5'x5') is considered non-compliant even if the extent of cracks is only 2 feet long. To avoid double counting, a square with multiple defects (e.g. cross slope and surface defects) was accounted for in only one category – whichever was more severe.
